

## Installation Instructions HACS

1) Navigate to HACS and add a “Custom Repository”.

2) Now paste the link to our Github repository:

<https://github.com/ambientika/HomeAssistant-integration-for-Ambientika>

3) Now search for “HomeAssistant Integration for Ambient'ka” and use our HomeAssistant Integration.

Attention: Your ventilation device must also be connected and you must use the same access data as in the app.
